INDUSTRY OVERVIEW

During the period under review, conditions for Pakistan's textile industry remained favorable. It has picked up a growing pace following the removal of Covid-19 restrictions. However, unprecedented hike in input prices at international level and continuous fluctuation in exchange rate has significantly increased the working capital requirements for many sub sectors of textile sector.

The domestic Polyester industry enjoyed maximum capacity utilization and respectively higher sales volume during the period under review, due to the strong market demand. Local PSF prices maintained the upward trajectory during the quarter. Domestic cotton use continues to be driven by the strong performance of value-added textile exports.

Going forward, prospects for Pakistan's export-oriented textile sector remain bright.
